41 responses

Average Rating: 7.4

As per feedback received from industry experts, the current syllabus for the various courses will help the students to enhance the interpersonal skills to large extent. Interpersonal skills include listening, teamwork, responsibility, dependability, leadership, motivation, flexibility and patience can be taught to students by incorporating few topics in the syllabus itself. This will definitely help the students for communicating and working with groups and individuals in their personal and professional life.

Does the syllabus have practical utility? To what extent on a scale of zero to ten?
41 responses

Average Rating: 7.4

Feedback obtained from industry experts reveals that the offered curriculum has practical utility to large extent. However, the curriculum can be developed in a such way that it will give more practical utility and ultimately leads to enhance employment opportunities.

According to you, which skills are necessary to make students employable and job-ready?

1. Logical thinking, analytical ability.
2. Soft skills such as communication skills, leadership, decision making, written and professional communication skills, translation into major languages.
3. Confidence and good content knowledge.
4. It is necessary to study the latest technology that will be used keeping in view the current problems and needs.
5. Up-to-date technology and information education is required as per the needs of the time. In Geography GIS & RS.
6. Problem-solving skills, Time management skills, Leadership skills, People skills, Communication skills, Teamwork.
7. Communication, perseverance and motivation.
8. Practical knowledge.
9. More lectures & demonstrations about Therapy orientations.
10. Role plays & practice of various treatment techniques.

11. Detailed training about various tests & assessment tools available in the market for the purpose of diagnostic practice & research.
12. More number of laboratory sessions and soft skills training sessions for students would be helpful.
13. Practical approach towards subject and deep understanding of the topics.
14. Communication skills, ability to take responsibility of their actions.
15. Communication, team work, self-management, professionalism, initiative.
16. Practical application, presenting their self in front of other, communication skill.
17. Commercial Mathematics and Statistics.
18. Soft skill like presentation, public speaking, research skills and practical aspect and application of the concepts learned in the syllabus.
19. Continuous Practice, Interview.
20. Communication, Presentation and Technical Skills.
21. Microbiological skills, identification skills.
22. Sound practical knowledge of Microbiological and chemical techniques, GMP and GLP rules. Basic fundamentals of subject, creativity.
23. CV writing, interview skills, mini-inhouse projects to enhance their understanding of the subject and practical skills will definitely be useful. Increasing their exposure to what kinds of jobs are available post their degree may help them work towards their end goal better also.
24. Communication, leadership, situation handling.
25. If a student is more focused towards web, then he should know MVC in order to get a job in the industry. Python, JavaScript is must for this Industry as both are highly in demand.

And if a student is more focused on Software/Application development he should be focused more on a single prog Language and know in detail about it i.e., built in methods, prog approach etc. And also, the student should know Data Structures very well.

26. Programming and soft skills.
27. Strong fundamentals with good theoretical knowledge of analytical or organic chemistry.
28. Hands on training in handling instruments, documentation and Students should develop skills to correlate practicals done in lab with theoretical concept.
29. Management Skills.

30. Excellent in Basic Fundamentals and Logically Thinking.
31. Currently the courses are very old if student wants to get a job in good and big company, they must need to know all the new technology, also they had to be good logically more than technically because technical thing we can learn from Google but logic we can't so if college must have to focus on the logical skill of students more.
32. Student should prepare more for practical skills rather than theory to be job-ready.
33. Need to focus more on practicals.
34. We need to focus on their ability to continuously learn new things, that itself is a skill. (Ability to re-invent themselves again and again).
35. Hands on training, problem solving skills, leadership qualities.
36. Effective communication, proactive, time management, stress management, on job skills through industrial internship.
37. Communication skills, sincerity, confidence, relevant knowledge.
38. Effective communication, industrial training.
39. Employability skills.
40. Good practical skills with analytical / synthesis knowledge.
41. In plant training during academic year.
42. Practical should increase by 2 folds.

Student Feedback On Curriculum (2020-21)

Do you feel that the curriculum offered by the college will help you pursue higher studies?
402 responses

Yes : 71.6%

No : 4%

To Some Extent : 24.4%

From the feedback collected from students, it is observed that majority of the students are satisfied with the curriculum provided in the college. Still some extra efforts can be taken by the teachers to update the curriculum of the college to get 100% satisfaction level of the students which will enable them to pursue higher studies in the coming future.

Do you think that the concerned curriculum will enhance your job opportunities?
402 responses

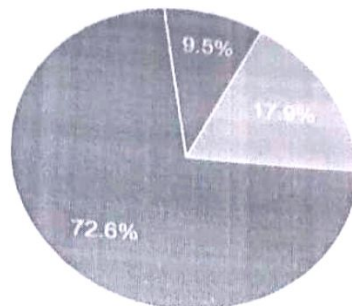

Yes : 60%

No : 8.2%

To Some Extent : 31.8%

From the above analysis, it would be recommended to take some measures to change the concerned syllabus as far as job opportunities are concerned. The curriculum should be developed in such a manner which will enhance the skill and competence of students and it leads to create better employment opportunities for the students.

Is the syllabus relevant to the present time?
402 responses

● Yes
● No
● To some extent

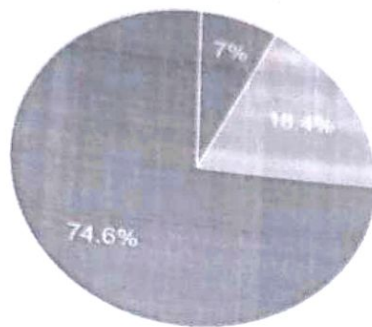

Yes : 72.6%

No : 9.5%

To Some Extent : 17.9%

Above feedback collected from students shows that most of the respondents are of the opinion that the current syllabus is relevant to the present time. But still some changes and updation is required in the current syllabus to get this percentage at 100. Updated syllabus relates the students with the practical world and helps them to have better future prospects.

1 Do you find the syllabus interesting?
402 responses

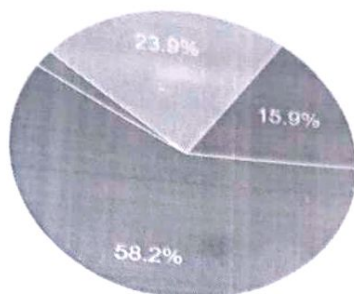

● Yes
● No
● To some extent

Yes	: 74.6%
No	: 7%
To Some Extent	: 18.4%

Above information shows that the respondents feel that the current syllabus is interesting and a very few percentage of students don't feel the syllabus that much interesting. The syllabus can be made more interesting by bringing more practicability in the syllabus.

do you feel that the certificate courses offered by your department are useful for better career prospects?
102 responses

- Yes
- No
- To some extent
- Not offered by Department

Yes	: 58.2%
No	: 2%
To Some Extent	: 23.9%
Not Offered By Department	: 15.9%

It can be interpreted from the above analysis that on an average students have benefited through the certificate course offered by college. Under autonomy, college can come up with some more well advanced certificate courses in order to create better prospects for the students. The departments who are not offering any certificate courses should start with some career oriented certificate courses.

Does the syllabus studied by you impart practical knowledge?
402 responses

Yes	: 69.4%
No	: 9%
To Some Extent	: 21.6%

From the above data it can be seen that about 69% of the students are of the opinion that the syllabus imparts practical knowledge in them. But still a few percentage of students are not of the same opinion. Teachers can try to include practical component in the syllabus and should see if it helps to impart practical knowledge among the students.

Does the curriculum offer you a choice to study as per your interest?
402 responses

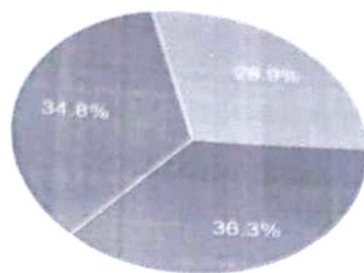

Yes : 67.2%

No : 10.9%

To Some Extent : 21.9%

From the feedback collected from the students, it can be interpreted that the curriculum should be framed in such a manner so that it can further increase a scope for the students to study as per the choice of their interest. By taking some additional efforts for framing the syllabus, it can be done more interesting and career oriented.

Do you feel that the contents of certain subjects overlap?
102 responses

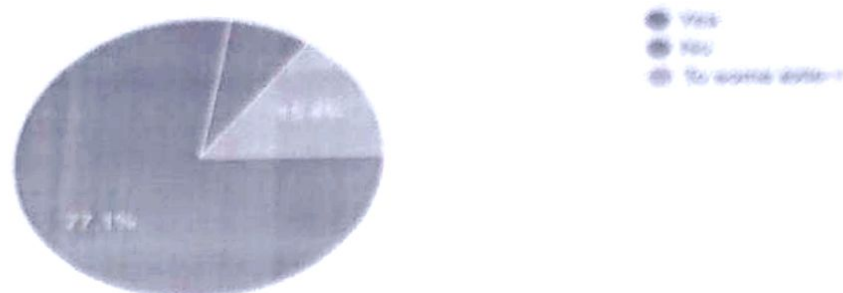

● Yes
● No
● To some extent

Yes	: 36.3%
No	: 34.8%
To Some Extent	: 28.9%

Above analysis shows that most of the students are of the opinion that the contents of certain subjects overlap. Through a proper syllabus framing committee, the syllabus can be updated and the contents which overlaps in certain subjects can be removed. Some practical component can be included in the syllabus to increase the area of interest among the students.

Does the curriculum have a provision for projects and assignments?
402 responses

Yes : 77.1%

No : 15.4%

To Some Extent : 7.5%

Above information reflects that a good percentage of the students are of the opinion that the curriculum consist of projects and assignments. Curriculum consisting of projects and assignments help to increase the interest of the students in the studies.

Curricular activities(Guest Lectures, Workshops, Debates, Quiz Contests, Power Point Presentations) arranged by your department enable overall personality development
402 responses

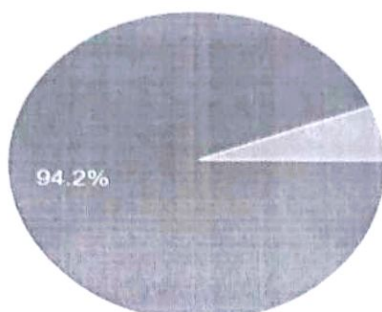

Yes	: 61.4%
No	: 4.7%
To Some Extent	: 21.6%
Not Arranged By Department	: 12.2%

Above analysis shows that a good percentage of students are of the opinion that the departments engaging co-curricular activities enable them to have an overall personality development. The departments can be motivated to engage additional such activities to have increased participation of students .
